

## BuumSorb® Water Absorbent Cushions and Protection Booms

- Where water can cause damage - harm reduction, prevention and waterproofing
- light, handy, durable, easy to store, easy to dispose  
 (household waste when the water does not contain any **environmentally hazardous substances**, otherwise governed by the applicable environmental and disposal regulations)

### Application areas and industries

- fire department, THW, plant protection
  - water utilities and sanitation enterprises
  - water protection device
  - bilge drainage in watercraft
  - building services - facility management and janitorial services
  - commercial plumbing and heating
  - workshops and central warehouses
  - hospitals and nursing homes
  - building protection - home, apartments, office buildings, public buildings, shopping malls
- Depending on the technical design, the cushions absorb between 10 to 22 litres of tap water and the booms 25 to 100 litres (20° dH - German hardness)
