

BuumSorb® Floor Protection Mats

for the absorption of aqueous and oily liquids

General Description

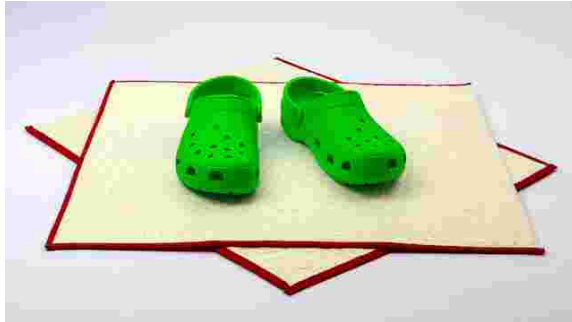

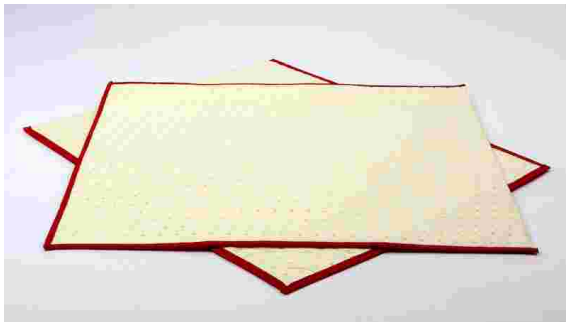

The absorbent mats made of polypropylene can be used everywhere **immediately or preventively**. Wherever unwanted environmentally hazardous liquids, such as chemicals, mineral hydrocarbons or urine, blood and water, are released in commercial and private areas.

They protect a wide variety of surfaces and floors from leaks, drops and splashes on a daily basis and ensure cleanliness and safety in the workplace, environment and in the household.

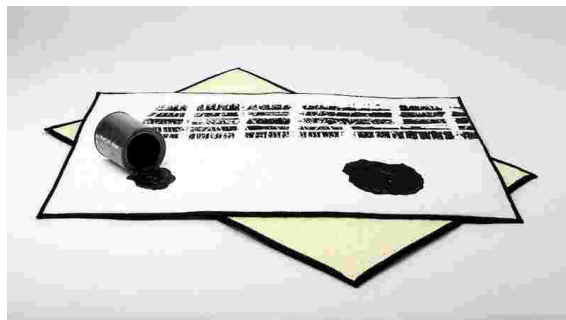

They also can be used as disposable mats in non-sterile areas.

Especially water will be absorbed by the inner core to a high degree.

- The **COMBINATION MAT** made of two components is very well suited for private and commercial applications. It absorbs liquids via the hydrophilic-yellow surface and the filling inside the mat will hold the water for a certain period of time.
- **Sales unit- carton a' 25 mats (Article-No. KM60.50.1) / CP1-pallet with 42 boxes**

- The **MULTI FUNCTION MAT** consists of three components, the hydrophilic-yellow side absorbs all liquids and water, the hydrophobic white surface binds all mineral hydrocarbons (MKW)
- **Sales unit- carton a' 12 mats (Article-No. MFM100.50.1) / CP1-pallet with 42 boxes**
