

BuumSorb® Floor Protection Mats for the absorption of aqueous and oily liquids

General Description

- The absorption mats made of polypropylene are used for the daily protection of surfaces and soil from spills, drops and splashes.
- They ensure cleanliness and safety in the workplace and the surrounding areas.
- They also can be used as disposable mats in non-sterile areas.

Functions of the individual materials

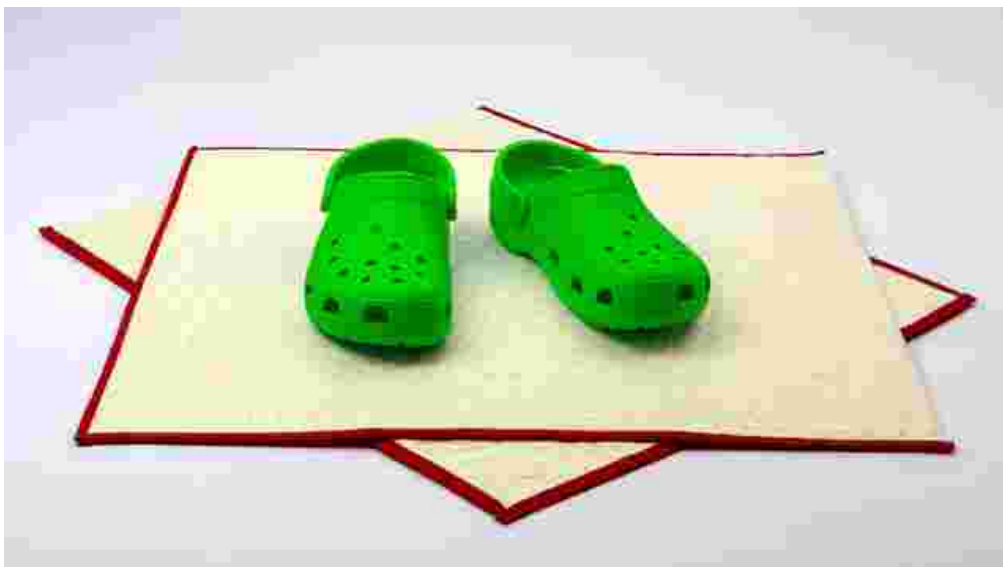

- The **hydrophilic-yellow** surface of the floor mat absorbs all kinds of liquids.
- The **hydrophobic-white** surface of the floor protection mat is also used for absorption of mineral hydrocarbons (MKW) on water and solid ground.

Useful application tip

- **Before using for the first time, make sure that the powder inside is spread around as evenly as possible.**

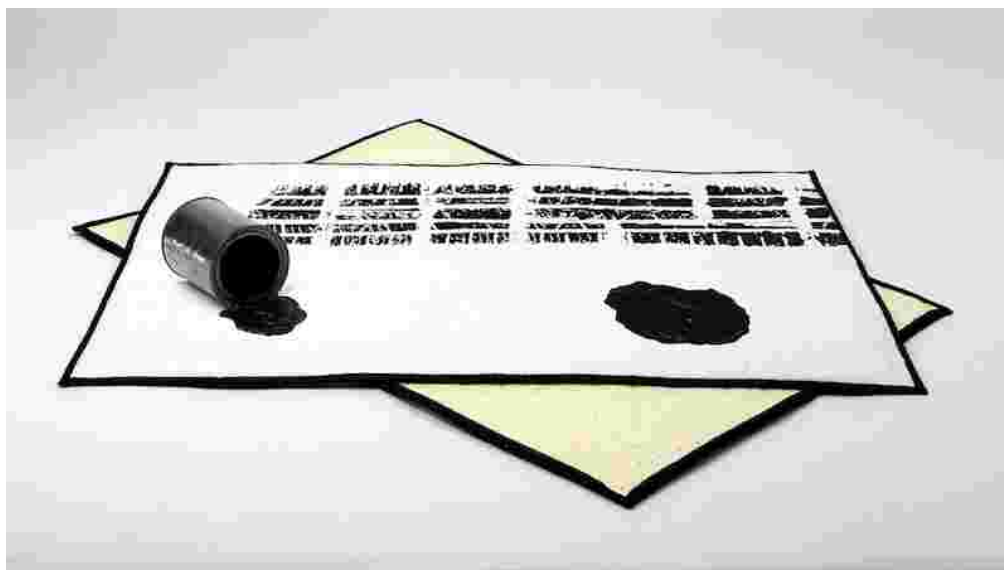

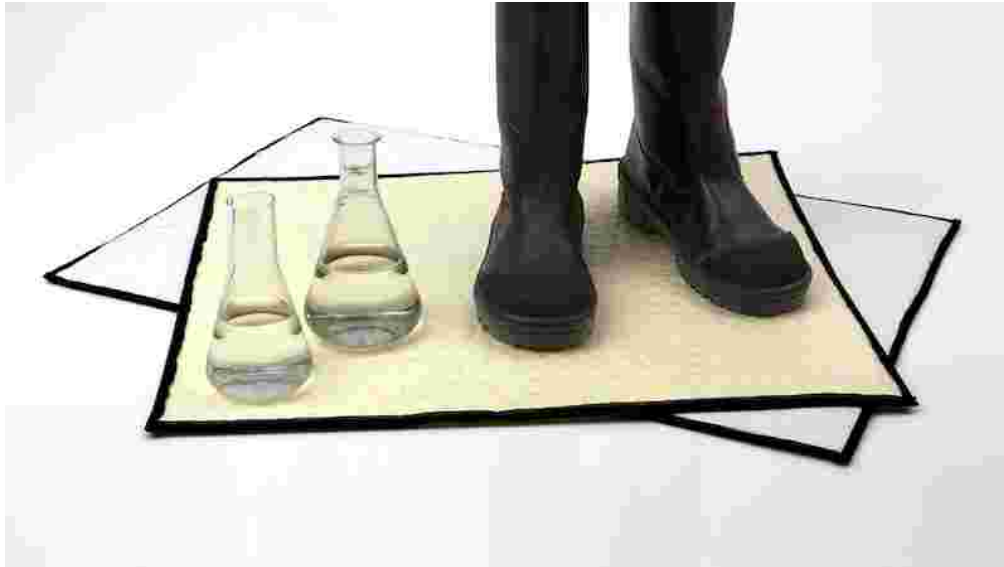

1. COMBINATION MAT

- are suitable for longer use.
- They have two phases, the first absorbs and the second additionally holds the liquid for a period of time.

2. MULTI FUNCTION MAT

- consists of three components
- the hydrophilic-yellow side absorbs all liquids and water
- the hydrophobic white surface binds all mineral hydrocarbons (MKW)
- third absorbent material holds the liquids inside for a certain period of time

Applications areas

- nursing homes, hospitals, rehabilitation centers and private households
- industry, workshops, central warehouses, parking areas and garages
- building protection - home, apartments, office buildings
- all public facilities and shopping centers etc.
- facility management and janitorial services

Additional note

- **The capacity of the mats varies depending on the type of liquid.**
