

## Compatibility List for BuUMsorb® absorbents

Chemicals	hydrophobic	hydrophilic	Chemicals	hydrophobic	hydrophilic
acryl-emulisions		*	hydrazine		*
acrylnitril		*	i-butyrat acid	*	*
acrylic acid		*	isobutyl alkohol	*	*
acrolien	*	*	isoproyl alkohol	*	*
allyl alkohol		*	isoproyl acetate	*	*
formic acid		*	potassium hydrate		*
amidobencol acid		*	calcium hydroxide		*
ammonia	*	*	carlold acid		*
ammonium hydroxide	*	*	castor oil	*	*
amyl alkohol		*	kerosene	*	*
aniline		*	keytones	*	*
aqua regia		*	cresol	*	*
ether	*	*	linseed oil	*	*
ethyl alkohol	*	*	magnesiumoxid hydrate		*
ethyl ether	*	*	mashine/- lubricating oil	*	*
ethyl acetate	*	*	methlyal alkohol	*	*
ethyl chloride	*	*	methyl ether	*	*
ethylen glycol		*	methy ethyl ketone	*	*
ethylpropionate	*	*	methyl chloride	*	*
acetal dehyde		*	methyl propionate	*	*
aceton	*	*	mineral oil	*	*
acetyl chloride		*	engine oil	*	*
cottonseed oil	*	*	naphtaline	*	*
petrol	*	*	natrium bicarbonate		*
petrol ether	*	*	natrium hydrate		*
benzene	*	*	natron salpêtre		*
benzene nitril		*	nitro benzene		*
benzene chloride		*	nitro benzene acid		*
benzyl alkohol		*	nitrotoluolne	*	*
boraci acid		*	octan	*	*
brake-fluid	*	*	olein acid	*	*
bromine		*	olive oil	*	*
butyric acide	*	*	paraffin	*	*
butyl alocohol	*	*	perchlor ethylene	*	*
butylamine		*	petroleum ether	*	*
butylacetate	*	*	phenol		*
quinoline		*	phenyl formic acid		*
chlorine benzene		*	phosphor acid		*
chlorine acetic acid		*	proanol		*

Chemicals	hydrophobic	hydrophilic	Chemicals	hydrophobic	hydrophilic
chlorine		*	propion acid	*	*
chlorine sodium		*	propyl alcohol	*	*
chlorine natron		*	proylen glycol	*	*
chloroform	*	*	cleaning agents		*
chlorsulfon acide		*	resorcine		*
chromic acid (50%)		*	saccharose		*
bleach		*	salpetre acid		*
cyclohexan	*	*	saline solution		*
diethylarin	*	*	hydrochloric acid		*
diethylamide ether	*	*	carbon disulphide		*
dichlor benzene	*	*	sulphur acid		*
dinitro benzene	*	*	soap sud	*	*
dioxan		*	silver nitrate		*
disooctyl-Phthalate	*	*	silicon oil	*	*
glacial acetic acid		*	starch		*
vinegar		*	styrol	*	*
vinegar hydride		*	synthetic engine oil	*	*
acetic acid		*	turpentine	*	*
acetic acid amylester	*	*	tetrachlorcarbon disulphide	*	*
aviation gasoline	*	*	toluole	*	*
fluorine hydrogen		*	transfomer oil	*	*
formaldehyde		*	triäthylen glycol	*	*
galvanizing liquid		*	trichlor ethylen	*	*
tannic acid		*	urine		*
corn oil	*	*	vinyl acetate	*	*
gearbox oil	*	*	hydrongen hyperoxide		*
glycerin		*	hydrogen cyanide	*	*
heating oil	*	*	xylene		*
heptan	*	*	zinc chloride		*
hexan	*	*	citric acid		*

## Important Note

- **All types of chemicals can react with polypropylene and cause the decomposition of the material.**
- **We recommend a compatibility test before each use and do not guarantee chemical compatibility.**
