

BuuMsorb® double oil absorbing mat with sealing on one side

These water-repellent two-layer absorption mats are used wherever where oil, petrol, diesel, heating oil or other liquids containing hydrocarbons, pollute and contaminate the soil and the surrounding area. It can be shared as needed.

They are a useful, practical and safe alternative to conventional protective measures, such as cardboard or felt pads and can be used both, inside and outside.

Due to the easy handling, they are ideal for at home and on the go.
